Maven Installation Guide

You can download and install maven on windows, linux and MAC OS platforms. Here, we are going to learn how to install maven on windows OS.

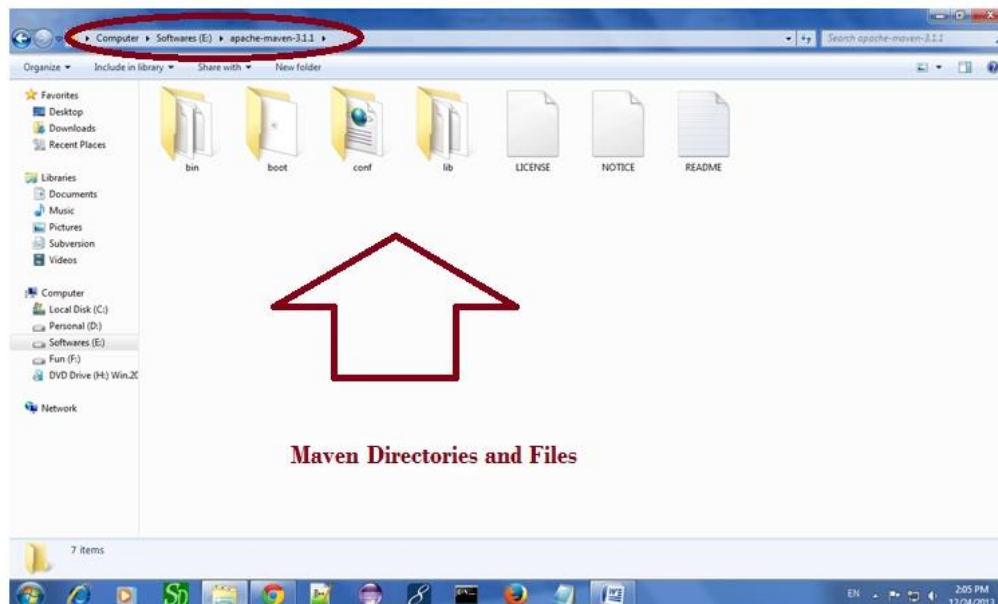

To install maven on windows, you need to perform following steps:

1. Download maven and extract it
2. Add JAVA_HOME and MAVEN_HOME in environment variable
3. Add maven path in environment variable
4. Verify Maven

Step1 : Download Maven

To install maven on windows, you need to download Apache maven first.

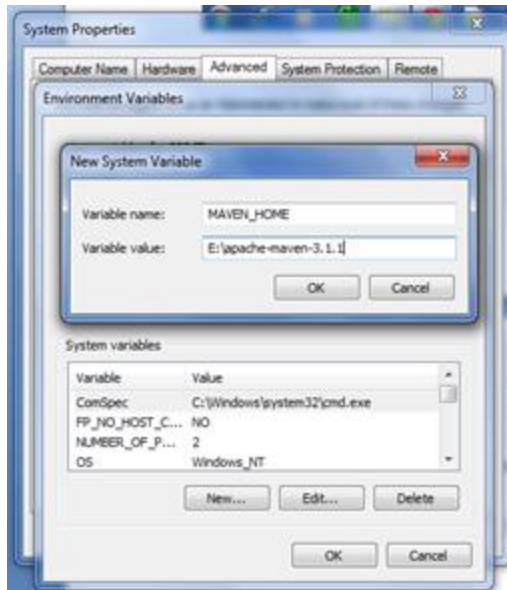

Download Maven latest Maven software from [Download latest version of Maven](#)
Once Downloaded, extract the zip file. e.g. **apache-maven-3.1.1-bin.zip**.

Step 2 : Set the Environment variable “MAVEN_HOME”.

Right click on **MyComputer** -> **properties** -> **Advanced System Settings** -> **Environment variables** -> **click new button**

Now **add MAVEN_HOME** in variable name and path of maven in variable value. It must be the home directory of maven i.e. outer directory of bin. For example: **E:\apache-maven-3.1.1** , It is displayed below and click OK.

Step 3 : Setting up Maven Path in Environment variable.

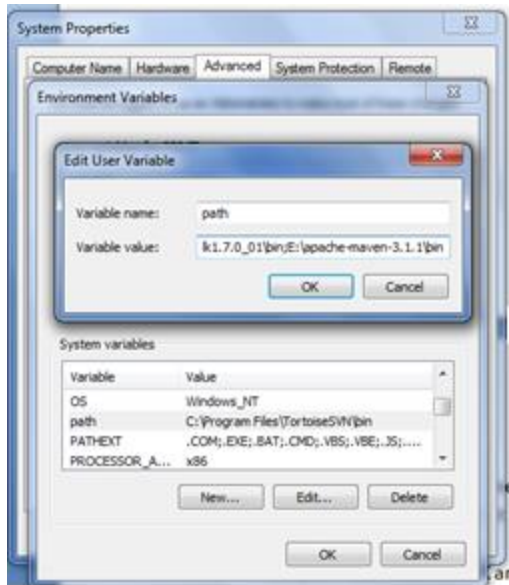

Right click on **MyComputer** -> **properties** -> **Advanced System Settings** -> **Environment variables**

Click on new tab if path is not set, then set the path of maven. If it is set, edit the path and append the path of maven.

Here, we have installed JDK and its path is set by default, so we are going to append the path of maven.

The path of maven should be **%maven home%/bin**. For example, **E:\apache-maven-3.1.1\bin** .

Note : Make sure that Java is installed and JAVA_HOME environment variable is set already.

Step 4 : Verify Maven Installation.

To verify whether maven is installed or not, open the command prompt and write below command.

mvn --version

Command Prompt

```
Microsoft Windows [Version 10.0.19042.1706]
(c) Microsoft Corporation. All rights reserved.

C:\Users\513513>mvn --version
Apache Maven 3.6.3 (cecedd343002696d0abb50b32b541b8a6ba2883f)
Maven home: C:\apache-maven-3.6.3\bin\..
Java version: 1.8.0_265, vendor: Red Hat, Inc., runtime: C:\Program Files\
Default locale: en_US, platform encoding: Cp1252
OS name: "windows 10", version: "10.0", arch: "amd64", family: "windows"
```
